PREFACE

This is the Eighth Issue of 'Agricultural Prices in India'. It describes the position of Agricultural Prices in 1957 and includes statistical tables on harvest, wholesale and retail prices of various agricultural commodities. The data have been drawn from a variety of sources, *e.g.*, State Bulletins, Journals and Gazettes, Publications of other Ministries, F.A.O. etc. The tables have been rearranged owing to reorganisation of States. Views expressed in the Introductory Note should not be taken as those of the Government of India.

The detailed work involved in the compilation of this publication has been done in the Agricultural Wages, Prices and Tariffs Branch of this Directorate.

R. N. PODUVAL,

NEW DELHI:
October, 1959.

AGRICULTURAL PRICES IN INDIA—1957

INTRODUCTORY NOTE

The rising tempo of Plan investment in both the public and private sectors was an important factor influencing prices during the year. The Plan outlay in the Public sector went up from Rs. 614 crores in 1955-56 to Rs. 685 crores (likely actuals) in 1956-57 and to Rs. 861 crores (likely actuals) in 1957-58. The volume of deficit financing also increased from Rs. 180 crores in 1955-56 to Rs. 238 crores in 1956-57 and to Rs. 464 crores in 1957-58. At the same time, the volume of bank credit rose from Rs. 632 crores at the end of 1955-56 to 781.7 crores in 1956-57 and to Rs. 890.08 crores in 1957-58. Deficit financing and expansion of bank credit (partly offset by a balance of payments deficit) led to an increase in the money supply from Rs. 2,184 crores in 1955-56 to Rs. 2,313 crores in 1956-57 and to Rs. 2,388 crores in 1957-58. These inflationary forces contributed to an upward trend in the prices of almost all important agricultural commodities.

Wholesale prices which rose almost continuously from 1955 to the end of 1956, tended to fall slightly during the first quarter of 1957, following a good harvest. However, this decline was short-lived and prices rose steadily from April, 1957 reaching their peak in August, 1957. Thereafter, due to various regulatory measures prices once again eased so that the general price level at the close of 1957 was the same as at the beginning of the year. The Economic Adviser's Index Number of wholesale prices of All Commodities, which stood at 108.1 in December, 1956 and at 107.3 in January, 1957 (Base 1952-53 = 100), registered a decline during the first three months of 1957. Thereafter it rose gradually and attained the highest level of 112 in August, 1957; but came down subsequently to 107 in December, 1957.

The increase in prices was especially evident in the groups "Food Articles" and "Industrial Raw Materials". The index of food articles rose from 105.1 in December, 1956 to 112.1 in August, 1957 i.e., by 6.7 per cent. This index, however, receded to 104 in December, 1957 which was a little lower than what obtained in December, 1956. The index of industrial raw materials went up from 119.4 in December 1956 to 121.6 in July, 1957 i.e., by 1.8 per cent; thereafter, however, it gradually declined to 115.4 in December, 1957.

The price index of cotton rose steadily from 109 in December, 1956 to 113 in February and March, 1957. During April to August the index fluctuated within very narrow limits. In September, 1957, however, it took a regular downward trend touching 97 in October, 1957. The index again showed signs of recovery and stood at 105 in December, 1957. The price index of jute rose from 138 in December, 1956 to 142 in January, 1957. The rise was, however, shortlived. The index declined from 135 in February, 1957 to 132 in April, 1957. After regaining the lost ground, in May the index stood at 142 and rose to 146 in June, 1957. From July, 1957 till the end of the year, jute prices declined. Thus, jute index which stood at 140 in July, 1957 receded to 129 in December, 1957. The index of oilseeds declined from 124 in December, 1956 to 119 in February, 1957, continued at this level till April, 1957 and thereafter advanced to stay at 125 in May and June, touched the peak during the season at 128 in July. Thereafter, the index started declining once again and gradually sagged to 119 in December, 1957.

Besides these general factors, there were certain specific factors which reacted on the prices of foodgrains during the year. The increase in consumers' demand as a result of growth in population, urbanisation, and increase in the real national income by 6% in 1956-57 over 1955-56 also contributed to the rise in prices in 1957. Not only was the actual consumption of foodgrains higher but the traders also contributed to building up stocks in anticipation of better prices. As a result, inspite of a substantial increase in production of foodgrains in 1956-57 prices continued to rise. Had there not been a marked increase in foodgrains production, it is felt the rise in prices might have been still greater. To a certain degree, increase in foodgrains production restrained the upward trend in prices during the year.

FOODGRAINS

Production of foodgrains (cereals and pulses) in 1956-57 estimated at 68.75 million tons was higher than in the previous year by 2.95 million tons showing a rise of 4.5 per cent; and slightly exceeded the previous peak of 68.72 million tons in 1953-54; both cereals and pulses shared in the increase.

Output of cereals in 1956-57 was estimated at 57.25 million tons as against 54.92 million tons in the preceding year. Output of pulses was 11.50 million tons compared with 10.87 million tons in 1955-56. Except for bajra, ragi, small millets and other pulses, output of all cereals and pulses was up in 1956-57 over the preceding year.

However, inspite of this substantial increase in production, prices tended to rise during the year. With a view to arresting the upward trend in foodgrains prices, the Government took various regulatory measures during the year under review. The remedial measures taken included: (i) arrangements for larger imports of wheat and rice; (ii) Government distribution of wheat and rice at price below the market rates through a net-work of fair price shops; (iii) amendment of the Essential Commodities Act, 1955 empowering the Government to requisition the stocks of foodgrains and its application to different States in respect of rice, wheat, gram and their products; (iv) imposition of a ban on the inter-zonal movement of wheat by forming three wheat zones and creation of a similar zone for rice covering the Southern States; (v) licensing of roller flour mills by the Union Government and delegation of powers to State Governments to regulate the foodgrain dealers; (vi) ban on movement of foodgrains with a view to facilitating procurement of rice, paddy and gram by the Central and State Governments; and (vii) announcement of maximum control prices of rice and paddy in some States.

These measures bore some fruit and the situation eased during the last quarter of the year 1957, when prices began to decline. The index of food articles as a whole declined during September, 1957. In December it was 104, lower by 8 points as compared to August, 1957.

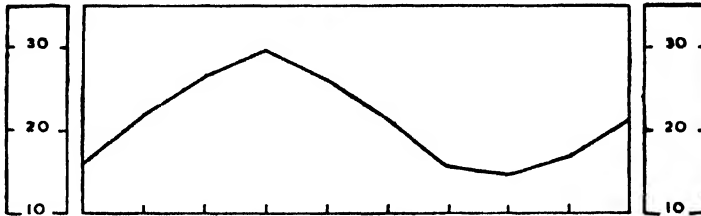

The price trends for individual commodities are discussed below :—

Rice—Production of rice during 1956-57 was estimated at 28.28 million tons as against 27.77 million tons in the peak year 1953-54 and 27.12 million tons in 1955-56. It was 4.3 per cent higher than in 1955-56. With the arrival of the new crop in the market, prices declined significantly in January, 1957. The All-India index of rice prices which stood at 101 in September, 1956 declined to 93 in January, 1957. During February and March, 1957, however, it continued at more or less the same level, thereafter, rising again to reach 111

in August, 1957. From September, 1957 the price index again began to recede, partly as a result of the various regulatory measures taken by the Government and partly as a result of the arrival of the new crop. The index fell to 102 in December, 1957. The rise in the price index for rice during 1957 was less than that in 1956 while the fall was greater. Thus, the rise (January—August) in 1957 was 19·4% as against 29·9% in the same period during 1956. Similarly the fall (August—December) in 1957 was 8·1% as compared to 6% in the previous year. In 1957 the seasonal fall also started a month earlier than in 1956.

Prices at individual centres also exhibited more or less a similar trend. At Tihu (Assam), prices of rice rose from Rs. 22 per maund in January to Rs. 25·75 in August and then fell to Rs. 21·50 in December. At Dumka (Bihar), prices of rice in January, August and December were Rs. 18, Rs. 22·50 and Rs. 20 per maund respectively. At Raipur (Madhya Pradesh), the price went up from Rs. 17 per maund in January to Rs. 21 in August and then receded to Rs. 19 per maund towards the close of the year. At Cuttack (Orissa), the price ruled at Rs. 15·75 in January and rose to Rs. 17·50 in August, it however, declined to Rs. 15·34 per maund in December. At Sainthia (West Bengal), the price rose from Rs. 20 to 24·50 per md. between January and August, 1957 and then receded to Rs. 19 in December. In the Southern rice zone, however, the fall started a month earlier. Thus at Nizamabad (Andhra Pradesh), the price rose from Rs. 17·19 per md. in January to Rs. 19·62 per md. in July and then fell to Rs. 16·23 in December. At Kozhikode (Kerala), the price rose from Rs. 18·25 per md. in January to Rs. 20·75 in July, but receded to Rs. 19 in December. Similarly at Shimoga (Mysore), the price rose from Rs. 14·31 per maund in January to Rs. 19·31 in July and then declined to Rs. 15·92 per md. in December. At Kumbakonam (Madras), the price hardened from Rs. 17 per md. in January, 1957 to Rs. 19·44 in May and then declined to Rs. 18·56 in December with slight fluctuations in the interval.

Millets and Maize—The production of millets (jowar, bajra and small millets) in 1956-57 stood at 12·10 million tons as against 12·03 million tons in 1955-56. As compared to 1955-56, the production in 1956-57 of bajra declined by 490 thousand tons, the estimated production being 2·89 million tons while that of jowar was 7·25 million tons registering an increase of 630 thousand tons over the production in 1955-56.

Due to the serious set-back in output of jowar during 1955-56, a strong upward pressure was noticed in its price during 1956. The price index for jowar reached the peak of 136 in November 1956. It witnessed a seasonal fall between December and March, and then the index began to rise till July, 1957 after which the prices of jowar shared the general downward movement in the prices of foodgrains. Thus, the index of prices for jowar remained at 119 during the first three months, rose to 128 in June and July and thereafter fell to 109 in December, 1957.

Prices of jowar in individual centres exhibited some fluctuations upto June-July, 1957 but they declined afterwards. Thus the price at Hyderabad (Andhra Pradesh) rose from Rs. 13·75 per md. in January to Rs. 15·19 in July and thereafter fell to Rs. 12·44 per md. in December. At Akola (Bombay), the price of jowar rose from Rs. 11 per md. in January to Rs. 13·50 in June and then fell to Rs. 10·50 per md. in December. At Jhansi (U. P.), the price rose from Rs. 12·81 in January to Rs. 13·56 per md. in July and then receded to Rs. 9·73 in December. Similarly the price at Jhalawar (Rajasthan) rose from Rs. 12·50 per maund in January to Rs. 13·50 in May and then fell to Rs. 10·25 in December.

Prices of bajra showed a tendency to decline from December, 1956 to March, 1957. Thereafter, prices rose rapidly upto July, 1957 and then sagged sharply. The index of prices of bajra declined from 136 in November, 1956 to 130 in March, 1957 and then rose to 142 in July. In December, 1957 the index of prices was at 117. At individual centres, the prices of bajra showed a similar trend. In the first half of the year, prices were on the whole more or less constant or rising but in the second half they were tending to come down. Thus the price at Anakapalli (Andhra Pradesh) rose from Rs. 12·50 in January to Rs. 13·75 in February after which it remained constant upto June. In July the price of bajra rose to Rs. 14·50 per md. but declined to Rs. 10 in October and then improved to Rs. 11·62 in December, 1957. At Rajkot (Bombay), the price went up from Rs. 19·75 to Rs. 22 in May and then declined to Rs. 17·50 in December, 1957. At Jodhpur (Rajasthan), the price ruled constant at Rs. 16 per md. upto April and then at Rs. 17 upto July, it rose to Rs. 18 in August and then declined to Rs. 15 in December. At Agra (Uttar Pradesh), the price declined from Rs. 14·12 in January to Rs. 13 in March and then rose to Rs. 16·12 in August. Thereafter it showed a seasonal fall and declined to Rs. 12·25 in December, 1957.

Maize—The production of maize was placed at 3·01 million tons in 1956-57 as against 2·56 million tons in 1955-56 showing an increase of 17·6%. The index of prices for maize rose steadily from 112 in January, 1957 to 127 in July and 126 in August. Thereafter, the index declined significantly and reached 105 in December, 1957, the level attained in November, 1956.

At individual centres prices of maize exhibited a hardening tendency in the first half of the year 1957 as in the case of bajra. Thus the price of maize at Khagaria (Bihar) rose from Rs 11·25 per md. in January to Rs. 15·50 in July. It, however, declined to Rs. 13·50 at the end of the year. At Ludhiana (Punjab), the price rose from Rs. 12 in January to Rs. 16·25 in July and then sagged to Rs. 11·25 in December. At Bhilwara (Rajasthan), the price ruled at Rs. 13·50 in January, Rs. 16 in July and Rs. 10·75 in December and at Bahraich (U.P.), it was Rs. 13·87 in January, Rs. 15 in July and Rs. 12 per maund in December, 1957.

Ragi—The production of ragi declined to 1·72 million tons in 1956-57 from 1·82 million tons in 1955-56 showing a fall of 5·6%.

The price index for ragi rose gradually from 97 in January to 112 in September, 1957 thereafter remaining constant at 110 in October and November and fell to 100 in December, 1957. Prices at individual centres showed a similar tendency.

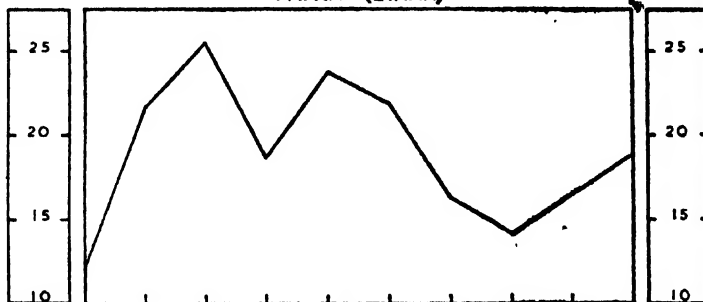

Wheat—A record production of 9·31 million tons of wheat in 1956-57 was registered as against 8·62 million tons in 1955-56. The increase in production in 1956-57 was 8% over the previous year's level.

The index of prices of wheat which was rising steadily from May, 1955 reached 97 in February, 1957. From March, however, it receded steadily and touched 86 in December, 1957. The fall during the first half of 1957 was an exception to the general uptrend in the prices of foodgrains witnessed during that period. In the second half of the year, however, prices of other cereals also shared the downward trend.

The prices at individual centres exhibited more or less similar trends. The whole-sale price of wheat at Moga (Punjab) declined from Rs. 18·06 per maund in January, 1957 to Rs. 15 in June but rose slightly to Rs. 15·25 in December. Similarly at Barnala (Punjab), the price of wheat fell from Rs. 16·75 in January to Rs. 13·37 in June, 1957 but rose to Rs. 13·50 in December. At Kotah (Rajasthan), the price rose to Rs. 16·50 in February from Rs. 15 in January, thereafter declined to Rs. 14·62 in June and further to Rs. 11·75 by the end of the year. In U.P., the prices dropped during the harvest season, but during the lean period they again tended to rise. Thus, the price at Hapur declined from Rs. 16·37 in February to Rs. 14·31 in May and thereafter rose to Rs. 15·75 by the end of the year. Similarly at Chandausi, the price fell from Rs. 17·25 in January to Rs. 14·50 in May, to rise again to Rs. 15·75 in December, with slight fluctuations in the intervening months. In Madhya Pradesh the prices went down in the first three quarters of the year and showed a slight rise only towards the close of 1957. In Sagar, the price fell from Rs. 16·44 per md. in January to Rs. 11·75 in August but rose to Rs. 13·50 in October and again receded to Rs. 12·50 in December, 1957. In Bhopal, the price receded from Rs. 16 per md. in February to Rs. 12·62 per md. in October but again rose to Rs. 13 towards the close of the year. In Bihar and Bombay prices did not show any appreciable fall but fluctuated throughout the year. In these States also, a seasonal fall was witnessed but during the lean period the prices again rose. Thus the price at Khagaria (Bihar) declined from Rs. 17 per md. in February to Rs. 15 in May, 1957, but after rising to Rs. 18 in July, again declined to Rs. 17 during August—November and touched Rs. 16 per maund in December, 1957. At Rajkot (Bombay), the price declined from Rs. 19·25 in January to Rs. 17·50 in April. After attaining the level of Rs. 19·31 in July, it fell to Rs. 17·30 per maund in December, 1957.

The behaviour of wheat prices indicated response to the various regulatory measures described earlier and an improved supply position. As mentioned earlier, the production of wheat in 1956-57 was a record one and in addition, imports of wheat were considerably stepped up during 1957. The quantity imported was the largest in the last one decade, barring 1951. As a result, the supply position of wheat in the country improved, and consequently, stocks of wheat with the Government also rose gradually during the year which helped in keeping prices under control. The stocks of wheat rose from 142 thousand tons at the beginning of 1957 to 742 thousand tons at the end of the year.

Barley—The output of barley in 1956-57 was estimated at 2·83 million tons as against 2·77 million tons in 1955-56, recording a rise of 2%.

The index of prices of barley declined from 113 in January to 94 in April, 1957. Thereafter it began to rise and reached 103 in July-August. However, it again started falling so as to reach 100 in September and 91 in December.

The prices of barley at individual centres showed a more or less similar trend. At Moga (Punjab), the price rose from Rs. 11 per maund in February to Rs. 12 in March and thereafter declined to Rs. 10·25 in June, 1957. In July, the price again rose to Rs. 11·44 but declined to Rs. 10·50 in October and remained stationary at that till December. At Jaipur, (Rajasthan), the price declined from Rs. 15 in January to Rs. 11 in April. With slight fluctuations, the price rose to Rs. 12·25 in July and then fell again to Rs. 9 in November. At the close of the year the price of barley at Jaipur was quoted at Rs. 10. In U.P. the price fluctuated unduly. For instance, at Hapur, it ruled at Rs. 13·12 in January, Rs. 10·50 in June and Rs. 9·75 in December. ■ ■ ■

Gram—Production of gram in 1956-57 reached an all-time record of 6.26 million tons as against 5.33 million tons in 1955-56 showing a rise of 17.4%. After a rise in the slack season of 1956-57, the prices started falling during the harvest season of 1957, which trend continued till the close of the year. The index of prices of gram rose from 78 in January to 80 in March, 1957 and then steadily declined to 65 in December, 1957. The rise in prices during the slack season of 1957-58 was checked owing to the increased production. The same price trend was also witnessed at individual centres. The price of gram at Hansi (Punjab) declined from Rs. 12.87 per md. in January to Rs. 10.94 in June; thereafter it rose by a rupee in July, but again receded to Rs. 10.87 at the close of the year. At Ganganagar also (Rajasthan), the price fell from Rs. 13 in January to Rs. 10.25 in May, rose to Rs. 11.25 in July and declined again to Rs. 10.75 in December. At Kanpur (U.P.), the price fell from Rs. 14.56 in January to Rs. 12.06 in May, rose to Rs. 13.31 in July, 1957 but thereafter declined to Rs. 11.84 in December. At Bhind (Madhya Pradesh), the price of gram fell from Rs. 13.31 in January to Rs. 10.69 in June, then rose to Rs. 11.44 in July and again declined to Rs. 9.84 in December.

SUGAR AND GUR

The year 1956-57 (November to October) witnessed a record production of crystal sugar in India. Production amounted to 20.29 lakh tons, an increase of 1.67 lakh tons over the previous season. This phenomenal increase in production was attributed partly to larger sugarcane production made possible by a larger area under cane, and regular and better supply of cane to sugar factories. The *per capita* consumption of sugar in India has been continuously rising during recent years. While it was 7.3 lbs. in 1951-52, it has risen to 11.40 lbs. in 1955-56 and 11.50 lbs. in 1956-57.

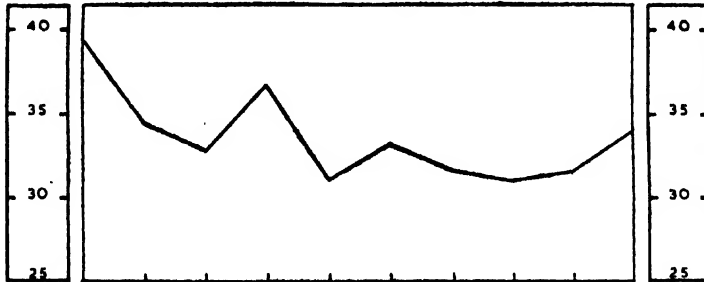

The consumption of sugar in India during 1956-57 was 19.80 lakh tons, a shade lower than that in the 1955-56 season. The surplus of production over internal consumption was exported. The supply and demand position being more or less balanced, prices of sugar remained generally steady until the middle of May, 1957. After that, a rise was witnessed which was attributed mainly to the following factors : (i) Speculative activity by sugar dealers, (ii) increase in excise duty from Rs. 4.12 to Rs. 8.25 per maund with effect from 16 May, 1957, (iii) imposition of inter-state sales tax of six annas per maund, and (iv) surcharge of four annas per maund on railway freight. The decision of the Government to permit the export of 2 lakh tons of sugar in the early part of the year also tended to strengthen the market. Speculative activity was, however, curbed by the release of additional quantities of sugar in the market and the imposition of restrictions on bank credit against sugar. With the commencement of the new crushing season, prices of sugar tended to drop. In December, 1957, the excise duty on sugar was increased and the sales tax abolished. This affected the wholesale price of sugar but the consumer price remained unaffected.

Since 1952, there has been no control over prices, movement and distribution of sugar except that sugar factories were required to retain 25 per cent of their production in reserve to meet any emergency. But with larger availability of sugar, the necessity to acquire the reserve stocks did not arise and the entire quantity was released for free sale. The minimum price of sugarcane for supply to factories was fixed at the previous year's level of Rs. 1.44 per maund for gate deliveries and Rs. 1.31 per maund for deliveries at rail centres.

The price of sugar during the year ranged between Rs. 30·44 per maund and Rs. 36·75 at Hapur and between Rs. 30·25 and Rs. 36·50 at Kanpur (U. P.). At Jullundur (Punjab), it moved between Rs. 29·37 and Rs. 36, at Calcutta between Rs. 31·50 and Rs. 37·87, at Bombay between Rs. 32·12 and Rs. 39·25 and at Madras between Rs. 30 and Rs. 36·44. The Economic Adviser's Index of Wholesale Prices of Sugar (Base 1952-53=100) stood at 109 during December, 1957 as against 94 during the corresponding month of the previous year.

The production of gur (including *khandsari*) during the 1956-57 season was estimated at 35·6 lakh tons as against 31·5 lakh tons in the preceding season. Despite higher production, the prices of both gur and *khandsari* during 1956-57 were higher than in the previous season. This rise in prices was partly in sympathy with that of sugar and partly due to increased demand for gur especially in rural areas. Towards the close of 1957, prices of gur tended to ease, with the crushing of the new (1957-58) sugarcane crop.

The Economic Adviser's Index of wholesale prices rose gradually from 97 in January, 1957 to 112 in October but closed with a sagging tendency at 110 in December, 1957. Thus the price of gur ranged between Rs. 9·87 and Rs. 16·50 per maund at Hapur, between Rs. 10·69 and 14·75 at Kanpur, between Rs. 12·50 and 17·25 at Madras, and between Rs. 17·50 and Rs. 23 at Bombay.

OILSEEDS AND VEGETABLE OILS

Production of the five major oilseeds (groundnuts, rape & mustard, sesamum, linseed and castorseed) during 1956-57 registered a substantial increase over the previous year and stood at 61·76 lakh tons as compared to 56·43 lakh tons during 1955-56. However, prices of oilseeds and vegetable oils which started rising early in 1956 kept to the same trend throughout 1957. During the whole year prices ruled high except for a slight fall towards the end of December. The fact that prices ruled high despite increased production and the ban on exports of oilseeds and edible vegetable oils indicates an increase in internal demand, which in turn is attributable to the higher levels of income generated by the quickening tempo of developmental activities under the Second Five-Year Plan. During 1957, there was a general rise in the prices of all agricultural commodities, and vegetable oils were no exception. The Economic Adviser's Index for prices of oilseeds as a group which stood at 124 in January, 1957 (1952-53=100) ruled steady at 119 during the following three months but rose to 125 in May. It rose further to 128 in July but then declined steadily to 121 in October and 119 in December, 1957.

A similar trend was in evidence in the edible oils groups. The Economic Adviser's Index Number of prices of edible vegetable oils fell from 131 in January to 122 in April, 1957 but later rose steadily to 134 in July. The index ruled at about 130 in subsequent months but receded to 125 in December. The average indices for 1957 for oilseeds and oils group (122 and 128) respectively were higher than those (115 and 117) for the previous year. The other factor contributing to the rise in prices of vegetable oils was the higher level of excise duty imposed in the 1957-58 budget, where it was increased from Rs. 70 per ton to Rs. 112 per ton with effect from 16 May, 1957. The Government of India took a series of steps to check the upward movement of prices. The Reserve Bank of India issued a directive to all banks to curtail advances in general and against foodgrains and sugar particularly. This step had a salutary effect on prices. In November, 1957 the Forward Markets Commission imposed a heavy margin of Rs. 25 per candy on all purchases of groundnuts above a level of Rs. 165 per candy. These measures tended to prevent a further rise in prices of oilseeds and vegetable oils. Throughout 1957, export of oilseeds and edible oils namely groundnut, rape & mustard and sesamum continued to remain banned.

Copra and Coconut Oil—The prices of both copra and coconut oil were marked by a rising tendency during 1957. Copra which was quoted in January at Rs. 40.06 per maund at Alleppey (Kerala) and Rs. 37.75 at Bombay advanced during the year to Rs. 58.94 and Rs. 57.25 respectively at the end of December. Prices of coconut oil also advanced from Rs. 60.19 at Cochin (Kerala) and Rs. 63.12 at Bombay in January to Rs. 81.75 and Rs. 85.25 respectively in the following December. The rise was particularly marked towards the closing months of the year. The Government of India's import policy for copra and coconut oil has been restrictive during the year, the quota basis for established importers for October, 1957—March, 1958 period being 20% for both copra and coconut oil (with provision for actual users in the case of copra) against 75% (with provision for new comers and actual users) during July—December, 1956. This policy partly accounts for the rising tendency in the prices of copra and coconut oil during 1957. The upward trend in the prices of copra and coconut oil was also in conformity with the rising trend of prices of oilseeds and vegetable oils in general.

Groundnut and Groundnut Oil—Prices of groundnut and groundnut oil in the important markets of the country which showed an upward trend from early 1956 continued to rule at high levels all through 1957. The increase in excise duty and the levy of a surcharge of 6½ per cent on railway freight on all commodities including oilseeds and vegetable oils in the budget proposals of 1957-58 accounted for the sudden spurt in prices of groundnuts and groundnut oil in the middle of the year. Another factor which helped the rising trend towards the close of the year was the removal of export duty on nigerseed oil, kardiseed oil and groundnut cake. Moreover the expectation that the Government of India would announce an export quota for groundnut oil and H.P.S. groundnuts also led to the rise. In spite of higher production and ban on exports of groundnut and groundnut oil, prices did not show any easing tendency. Production of groundnuts increased from 38.01 lakh tons in 1955-56 to 42 lakh tons in 1956-57. In November 1957, immediately after the abolition of export duties on niger and kardi oils and groundnut oilcake, groundnut and groundnut oil prices started moving up. It was then that the Forward Markets Commission imposed a heavy margin on sales of groundnut kernels above the level of Rs. 165 per candy. This had a sobering effect on the market for oilseeds and vegetable oils in general.

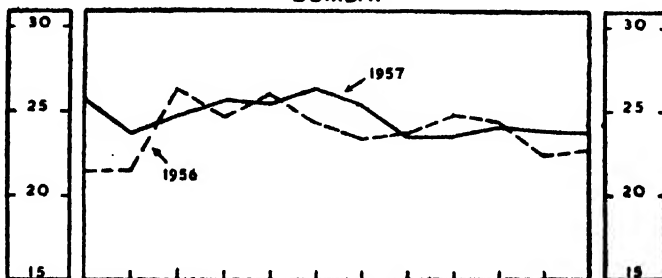

The Economic Adviser's Index number of wholesale prices for groundnuts rose from 111 in January to 117 in July, 1957 but declined steadily until it touched 102 in December. The price index for groundnut oil which stood at 106 in January increased to 112 in July. Till November, the index stood above 105 but in December, 1957 it receded to 102.

Linseed and Linseed Oil—Contrary to the general trend in oilseeds and vegetable oils markets, linseed and linseed oil prices during 1957 ruled at lower levels as compared to 1956. Indian linseed oil has been facing increased competition from U.S.A., Canada, and Argentina. Prices of linseed oil moved down in the first half of the year because of weak overseas enquiries. About the middle of the year, there was heavy selling of linseed oil in European markets by Argentina and Canada since both these countries were confronted by a surfeit in domestic production. Apart from this, the U.S. Commodity Credit Corporation released a large quantity of linseed oil from their stocks. Later in the year the position improved so far as enquiries for Indian linseed oil from U.K., Australia and Germany were concerned. Reports of a fall in the estimated production of the Canadian crop and of considerable damage caused to U.S. crop by "aster yellows" helped in improving the prices of Indian linseed oil. Towards the end of 1957, prices of linseed and linseed oil registered further improvement as a result of anticipation of a lower crop in U.S.A. and closure of

Canadian ports. The Economic Adviser's Wholesale Price Index (Base 1952-53=100) of linseed and linseed oil which stood at 126 and 122 respectively in January, 1957 moved down to 109 and 105 in March, then rose to 113 and 112 in May. In December they stood at 117 and 112 respectively.

Castorseed and Castor Oil—Prices of castorseed and castor oil which shot up to very high levels during the closing months of 1956 owing to troubled political conditions in the Middle East came down substantially in the beginning of the year under review. The general level of prices during 1957 was high and prices of Indian castor oil were generally out of parity with prices in overseas markets. In the beginning of the year, the downward movement of home prices was occasioned by an increase in freight rates by 10 per cent and a surcharge of $2\frac{1}{2}$ to $17\frac{1}{2}$ per cent for shipments of oil between India and Europe. The increase in excise duty in the 1957-58 budget pushed up prices in the middle of the year. Export prospects for castor oil remained dull throughout the year because of severe competition from Brazil in the overseas markets, particularly U.S.A., and prices declined. The Economic Adviser's Index Number of Wholesale Prices for castor oil which stood at 116 in January, 1957 came down to 105 in March and then moved up to 113 in May. In December 1957, the index registered 108.

Mustard Seed and Mustard Oil—The movement of prices of rape & mustard seed and oils during the year under review showed an uneven trend. Prices which ruled at very high levels during the closing months of 1956 and January, 1957 eased slightly in February and March to rise subsequently. A significant downward trend was noticed in December, 1957. The upward trend in prices despite the increase in production from 846 thousand tons in 1955-56, to 1026 thousand tons in 1956-57, reflected the increase in domestic demand for mustard seed and mustard oil. Prices of mustard seed and oil at Kanpur which stood at Rs. 40 and Rs. 92 per maund respectively at the end of December, 1956 declined to Rs. 32 and 73 at the end of December, 1957.

Sesamum and Sesamum Oil—Prices of sesamum seed and oil also reflected the general tendency for oilseeds and vegetable oils. Increased demand for edible oils in general was responsible for the upward trend in prices. Production of sesamum seed registered a small decline from 460 thousand tons in 1955-56 to 442 thousand tons in 1956-57. This factor also aided the upward trend in prices. The quotations for sesamum seed and oil in Bombay which stood at Rs. 32.69 and Rs. 72 per md. respectively at the end of January, 1957 rose to Rs. 36.25 and Rs. 76.37 at the end of July, but dropped to Rs. 33.12 and Rs. 63.94 per md. respectively at the end of December, 1957.

COTTON

Prices of cotton generally ruled high during 1957 and Government took measures from time to time to check this trend.

The year commenced with a firm trend in the prices of cotton when Jarilla M.G.F. at Bombay advanced from Rs. 730 per candy at the end of December, 1956 to Rs. 770 at the end of January, 1957. The price of Deshi Cotton at Abohar (Punjab) also advanced from Rs. 667 per candy towards the end of 1956 to Rs. 677 by the end of January, 1957. The

uptrend was further strengthened during February by the announcement of an export quota of 50,000 bales of Bengals and 150,000 bales of other exportable varieties of maximum staple $\frac{3}{4}$ ". By the end of March, the price of Jarilla M.G.F. at Bombay and that of Deshi at Abohar rose to Rs. 800 and Rs. 686 respectively. On 31 March, 1957 further export of Bengal Deshi and other exportable varieties (excluding Joda, Comilla and Pickings) was banned. As a result, price of Jarilla M.G.F. at Bombay came down to Rs. 770 and that of Deshi at Abohar to Rs. 677 in April. During the following three months, the prices again rose; at the end of July, Jarilla M.G.F. at Bombay and Deshi at Abohar were quoted at Rs. 800 and Rs. 686 respectively. Thereafter, the prices receded again, but due to some purchases by needy mills, the declining trend was arrested in September. The prices of Jarilla M.G.F. (Bombay) and Deshi (Abohar) were quoted at Rs. 795 and Rs. 686 in October as against Rs. 775 and Rs. 667 in August. Towards the close of the year the market ruled weak owing to an upward revision of crop estimates, the increasing pressure of new crop arrivals and the increased stocks with mills. In December, the prices of Jarilla M.G.F. (Bengal) and Deshi (Abohar) fell to Rs. 760 and Rs. 522 respectively.

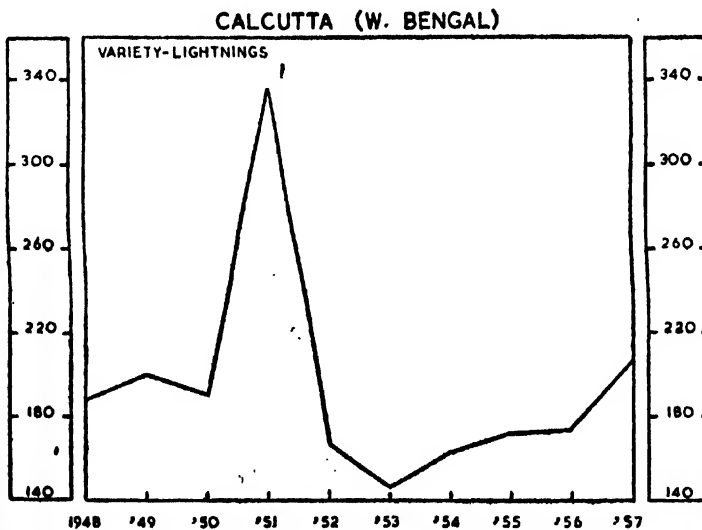

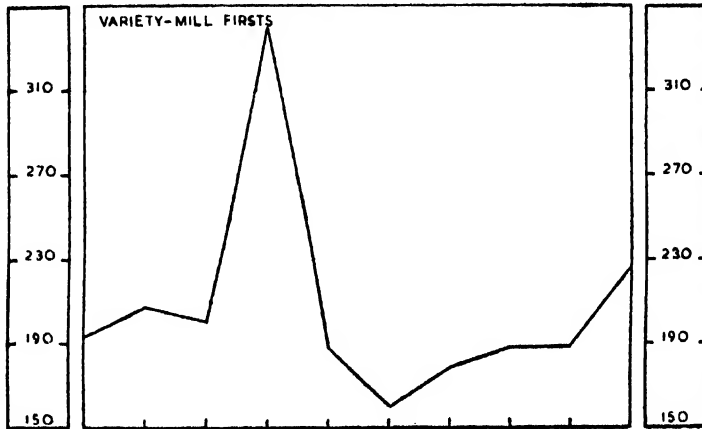

JUTE

The raw jute and jute goods market fell substantially towards the close of 1957. At the end of 1956, the prices of jute generally ruled steady. Assam Bottom Jute was quoted at Calcutta at Rs. 32·50 per maund in the last two months of 1956. During January, 1957 the prices continued to rule at that level on account of purchases by mills, the rising trend of prices in Pakistan and the announcement in Dacca of the Pakistan Government's decision to form a Jute Marketing Board and a Jute Marketing Corporation. In February, 1957 the prices declined sharply to Rs. 27·50 per maund due to increased arrivals from mofussil centres and poor overseas enquiries for jute goods. The month of March witnessed a slight recovery and prices of Assam Bottom advanced to Rs. 28·50 per maund, thanks to a continued upward trend in prices in Pakistan markets and to apprehensions of shortage of supplies in India. In April the prices improved further by a small margin to Rs. 29 per maund, on reports of some enquiries in Hessians from Argentina and also due to paucity of stocks. Prices hardened further in May and June due to labour unrest, continued absence of rains and the consequent delay in sowings. Higher advices from New York and greater support from Argentina and Burma further assisted the upward trend. The price of Assam Bottom advanced to Rs. 31 per maund during May and Rs. 32·50 during June, 1957. Due to favourable crop reports and the arrival of the consignment at the mills' stations, prices dropped again. Nevertheless, in September, there was a slight improvement and price advanced to Rs. 30 per maund as against Rs. 29 at the end of August. U.S.A., Australia, Burma and the U.S.S.R. showed some interest. Reflecting the downward trend in goods, Assam Bottoms at Calcutta continued to decline during October and November. With more arrivals of the new crop, the prices receded further, Assam Bottom being quoted at Calcutta at Rs. 26·75 per maund at the end of December, 1957, showing thereby a fall of 18 per cent as compared to the prices ruling a year ago. The Economic Adviser's Index Numbers of Prices (Base 1952-53=100) of jute manufactures and raw jute showed a similar trend during the period under review. In December, 1957 Economic Adviser's Index Number Prices of jute manufactures and raw jute stood at 93 and 129 as against 104 and 138 respectively in December, 1956. The price of Hessian at Calcutta fell from Rs. 43·75 in January to Rs. 39·40 per 100 yards in December, 1957. Similarly the price of sacking declined from Rs. 115·50 in January, 1957 to Rs. 106·30 per 100 bags in December, 1957.

BLACK PEPPER

The fall in the prices of black pepper noticed during 1956 continued in the first quarter of 1957. Prices, however, showed a distinct tendency to improve during the second and third quarters. Over the year as a whole, the underlying sentiment of the pepper market was weak due to increasing competition in overseas markets from Indonesia and Sarawak.

During 1956, the price of pepper at Cochin (Kerala) had declined from Rs. 97·94 per md. in January to Rs. 70·37 at the end of December. The downward trend continued in the first quarter of 1957 and black pepper was quoted at Rs. 65 at Cochin at the end of March, 1957. The market thereafter took an upward trend and ruled at Rs. 74·19 during May and June. In the second half of the year, the price again started falling. At the end of December, 1957, the price of black pepper Cochin was Rs. 65 per maund as compared to Rs. 70·37 a year ago.

RUBBER

Rubber prices are fixed by the Government from time to time in consultation with the Rubber Prices Advisory Committee, as laid down under Section 13(1) of the Rubber (Production and Marketing) Act, 1947. Apart from reviewing periodically the cost structure, the Government referred the question of granting protection to rubber to the Tariff Board in 1951. The Board fixed a price of Rs. 128·50 per 100 lbs. for one year and the Tariff Commission after examining the issue in 1952 fixed it at Rs. 138 inclusive of an allowance of Rs. 6·25 for rehabilitation. In February, 1955, it was again decided to raise the price of rubber to Rs. 150 per 100 lbs. of group 1 with suitable differentials for other groups. These prices were further raised in September, 1955 when the price of Group 1 was fixed at Rs. 155·75 per 100 lbs. (f.o.b. Cochin) with suitable adjustments for other groups. These prices continued to remain in force during 1956 and 1957.

WOOL

During the first half of 1957, prices of Joria white wool exhibited an upward trend but in the later half prices ruled easier. Thus Joria white wool at Bombay which was quoted at Rs. 267·37 per maund during January and February, 1957 rose to Rs. 282·87 per md. in March and remained at this level upto May. The rise was again witnessed in June, when the price advanced to Rs. 294·44 per md. and ruled at this level in July also. In the following months the price tended to come down and the year closed with prices of Joria white wool at Bombay prevailing at Rs. 257·69 per maund, a level which was lower than the price a year earlier by nearly Rs. 10 per md. The all-India index of wholesale prices of wool receded by 2·5 per cent during the course of the year from 118 in January to 115 in December, 1957.

TURMERIC

The prices of turmeric in India exhibited a downward trend during the year. The average price of turmeric at Calcutta during 1957 was about Rs. 23 per md. as against Rs. 43 per md. during 1956 and Rs. 74 per md. during 1955. The prices of turmeric had risen very high during the period 1953 to 1955. The price at Calcutta was quoted at Rs. 25 per md. during January, 1957 as against Rs. 29 per maund during December, 1956. It rose to Rs. 27 during March but again declined to Rs. 24 per md. in April. Thereafter, the price gradually declined and was quoted at Rs. 20 per maund at the end of December, 1957. A similar trend was apparent from the all-India index of wholesale prices of Turmeric which fell from 98 to 75 during the course of the year. The substantial increase in output (172 thousand tons in 1955-56 and 153 thousand tons in 1956-57 as compared to 130 thousand tons in 1954-55) was mainly responsible for the fall in prices.

TEA

The production of tea according to the partially revised estimates of 1956-57 was estimated at 667·7 million lbs. as against 636·9 million lbs. during 1955-56, showing an increase of about 30 million lbs. over the previous year.

The upward trend in the prices of tea, which was noticed in the later part of 1956, was reversed and during 1957 tea prices sagged. This setback in prices was attributable mainly to a slackening of demand from U.K., the most important buyer of Indian tea following considerable accumulation of stocks due to heavy imports in 1956 coupled with a large carry over from 1955. Delays in shipments bound for U.K. as a result of the Suez Crisis in 1956, the tight money market conditions, increase in bank rate in U.K. were also contributory factors.

With the arrival of the new crop, the price of common tea tended to rise slightly but it could not stage a recovery to any appreciable extent, due to the fact that the world output during 1957 exceeded the record level of 1956 by a fair margin, lending an easy tone to the tea markets, with its consequential repercussions on the Indian markets. The cheaper cost of production in the tea growing countries especially East Africa led to keen competition for Indian tea in world market. In London market during the greater part of the year, price of Indian common tea was lower than that in Calcutta.

Contrary to the setback in the prices of common tea, the superior type of tea received considerable support due to large purchases by U.S.S.R. and continued demand from U.K. During November, 1957 there was a welcome recovery in the prices of all varieties of tea due to (a) active buying by U.K. to replenish the stocks which were by then considerably depleted, (b) strong demand from Iran and Turkey, and (c) increased purchases by the domestic buyers owing to anticipated scarcity of certain varieties of tea during summer months.

The all-India index of wholesale prices of tea (Base 1952-53=100) declined from 198 in January, 1957 to 160 in March; thereafter the index improved and reached 194 in July, 1957, but gradually declined again to 157 in December.

A similar trend was witnessed at individual centres. Thus, at Calcutta the price of Medium dust for internal consumption declined from Rs. 1·91 per lb. in January to Rs. 1·40 per lb. in May, 1957. During June to November price of Medium dust showed some recovery and ranged from Rs. 1·50 per lb. to Rs. 1·74 per lb. The rise was short-lived and the price receded again to Rs. 1·62 per lb. towards the close of December, and was lower than that at the beginning of the year.

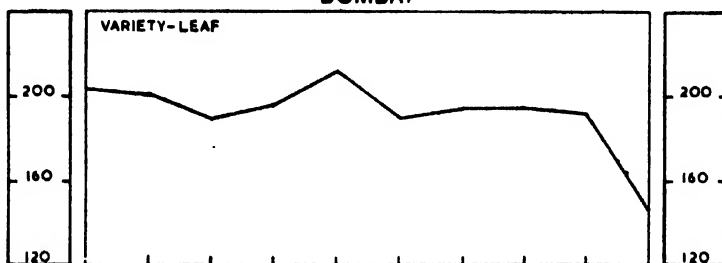

COFFEE

According to the final estimates, the production of coffee during 1956-57 was placed at 78·9 million lbs., the highest ever recorded as against 75·8 million lbs. during 1955-56, showing a rise of 4 per cent. The price of coffee generally ruled firm during the year under review. Starting with a firm tone in January it continued to rise till the end of March, 1957. The price of Native Flats coffee at Coimbatore rose from Rs. 162 per cwt. in January, 1957 to Rs. 169 in March. With the arrival of the new crop, it, however, declined to Rs. 168 in April. But due to enhancement of the central excise duty on coffee from Rs. 21 to Rs. 39·20 per cwt. in May, 1957, price of Native Flats rose to Rs. 187 per cwt. As the enhanced duty was subsequently withdrawn by the Government with effect from 1 June, 1957, the

CALCUTTA (W. BENGAL)

price of coffee declined slightly to Rs. 174 and Rs. 173 per cwt. in June and July respectively. Thereafter the price again rose to quote at Rs. 192 per cwt. in October. There was a slight decline by a rupee in November and the price continued at that level till the close of the year. The price of coffee in December, 1957 was higher than that in December, 1956 by 22 per cent.

The all-India index number of wholesale prices (Base 1952-53=100) of coffee which stood at 80 in January, 1957 rose to 89 in May, 1957. Thereafter it declined slightly in June and July but firmed up again to reach 91 in October, 1957. The index again receded to 88 in December.

CHILLIES

The output of chillies according to the final estimates for 1957-58 was placed at 355 thousand tons against 342 thousand tons in 1956-57. The prices of chillies recorded a substantial fall during the later half of 1957 due to increased output. The price at Patna was quoted at Rs. 70 per md. in January and February, 1957. In March, it rose to Rs. 80 and remained at that level till July; there was again a setback to Rs. 70 per md. at the end of August. The subsequent months also witnessed a steep fall in prices. The year closed with prices of chillies at Rs. 40 per maund. The all-India index of wholesale prices of chillies also declined from 167 in January to 150 in December, 1957.

TOBACCO

According to the final estimates (partially revised) production of tobacco during 1956-57 was estimated at 294 thousand tons compared to 298 thousand tons during 1955-56.

The price index for tobacco (raw) which stood at 85 in January, 1957 declined to 84 in April. Afterward its index rose steadily to 91 in July which was attributable to a fall in production. After registering a decline of 2 points in August, the price index of tobacco rose again in September and advanced to 96 in December.

Price of Motihari variety at Calcutta rose from Rs. 97·87 per maund in January to 126·16 per maund in May, 1957. It declined to 116·16 in July but again firmed up to Rs. 118·63 per maund in December.

During the year under review the annual average Index Number of Tobacco (Base 1952-53=100) was 88·8 which was higher than the annual averages of 78·4 and 78·7 during 1955 and 1956 respectively.

BETELNUTS

Prices of betelnuts in India rose to high levels during 1957. During the first two months of the year the price of the 'Mangalore' variety at Madras was quoted at Rs. 164·56 per maund. In the next two months, i.e., March and April, the price rose to 167·87 per maund. During May-June, it again reverted to its earlier position of about Rs. 164·56. In July the price registered a further rise and was quoted at Rs. 171·12 per maund. An upward trend was maintained in the betelnuts market till the end of the year. In December, prices stood at Rs. 230·37 per maund as against Rs. 164·56 at the end of January.

SHELLAC

The year 1957 opened with T.N. shellac prices at Rs. 105 per maund in Calcutta. The prices declined to Rs. 86 by the end of February. The fall was attributable to the absence of demand and to heavier crop arrivals both in Bihar and Madhya Pradesh. In March, the same falling tendency was witnessed. Fresh overseas demand was poor due to a wait and watch policy. Stocks accumulated both in India and abroad and hence the T.N. prices ruled low at Rs. 85 per maund.

The bumper Katki crop had its effect in April, 1957. The market was dull and T.N. prices fluctuated narrowly between Rs. 83 and Rs. 90 per maund. The month-end quotation for April was Rs. 88 per maund. During May and June the market remained dull due to seller's reserve and the arrivals of the Baisakhi crop. Prices further declined during the first fortnight of July due to heavy accumulation of stocks in London. Afterwards some activity was in evidence on account of U.S. buyer's interest as the new crop in Siam was small. This fact pushed up the prices; U.S.A.'s interest continued in August, and prices rose to Rs. 88 per maund towards the end of the month. Prices dropped in September due to the increase in the British Bank Rate. This was reflected in the Calcutta market also where as against an increase in the prices of T.N. shellac during the first few days of September due to U.S. demand, the prices fell by Rs. 5 per maund by the end of the month. The lac market in October opened with T.N. prices at Rs. 83 per maund which advanced steadily to Rs. 92 towards the close of the month owing to very good demand from Russia and China. In November and December the market again became dull and the year closed with the T.N. prices at Rs. 75 per maund.

CONCLUSION

To sum up, the year 1957 witnessed an all round general rise in the prices of all agricultural commodities. Despite substantial increase in the production of wheat, rice, jowar and barley, prices did not show a corresponding fall but continued to rise. It was a paradox and a baffling problem for the Government to tackle. If the production had not increased considerably, prices might have risen still further. The rise in the prices of foodgrains is attributed to the increase in consumer's demand through growth of population, urbanisation, shift from inferior to superior qualities of foodgrains and increase in *per capita* income.

Similarly the output of cotton was higher during 1956-57. Prices rose steadily in the beginning of the year but after fluctuating within narrow limits showed a downward trend in the middle of the year; signs of recovery were, however, noticed towards the close. The production of jute was also higher but prices exhibited an upward trend in the first quarter and declined in the later half.

Oilseeds and oils were no exception. Production of the five major oilseeds (groundnut, rape & mustard, sesamum seed, linseed and castorseed) during 1956-57 registered a substantial increase. Prices throughout the year ruled high except for a slight fall towards the end of December.

The general rise in the price level is due to increase in money supply, quickening tempo of developmental activities and their expenditure under the Second Five-Year Plan. To arrest and control the rise, especially in foodgrains, raw materials, oilseeds and oils, various regulatory measures were taken by the Government from time to time which had salutary effects.
